

Hi Jasmin,

Guess where I am? I'm at Easter Island! I decided to see these massive statues today.

Can you believe how big these statues are? They are 13 metres high and weigh about 27 tonnes. There are so many statues here, I can't even count. Scientists say there are 600 giant statues of humans. That's crazy! Their eyes are made from red lava, and the statues are hard volcanic rock. Did you know that these statues were carved 2000 years ago? I wonder why people made these statues. Well anyways, I have to go now. Next, I'm traveling to England.

See you soon,

HtJurdanes
